Subject: EV charging points
Date: Friday, 16 August 2019 3:31:42 PM

I have an e-Golf but the main restriction is the lack of public, fast charging points. The main beneficiaries of EV vehicles are the power companies. Currently the petrol companies have built a network of petrol stations because it is their economic interest to do so.

Surely the power companies should be 'encouraged' to do likewise (eg Powerco has installed a charging point in central New Plymouth-why not Meridian etc)

Regards

Keith Allum
